1. Press Wireless is prepared in the near future to begin transmission of civilian radio communications to the United States from Manila in clear, as is now being done from Leyte.

2. There is no security objection to this service provided messages are censored 100% by Civil Censorship Detachment.

3. Beam Wireless may request approval for service to Australia.

4. It is requested that the attitude of the Commonwealth Government be determined on above. Is it desired that request of telecommunications companies for such service be referred to Civil Affairs?

The Commonwealth Government has taken no action toward opening of additional mail service. In the meantime, mail for friendly and neutral countries is accumulating and residents of liberated areas have no channel of communication with the outside world except to the U.S. A considerable amount of internees mail addressed to other countries was received this date and will receive expedited treatment. Request the Commonwealth Government be checked again on this matter and the War Department advised if it is decided to authorize this service.
